# List of Contents

## NUMBER 1

- |  |     |  |
|--|-----|--|
| <b>John M. Mulvey and<br/>Bala Shetty</b>  | 1   | Financial planning via multi-stage stochastic optimization   |
| <b>Dong Cao and Mingyuan<br/>Chen</b>  | 21  | Using penalty function and Tabu search to solve cell formation problems with fixed cell cost   |
| <b>Giovanni Celano, Antonio<br/>Costa, Sergio Fichera and<br/>Giovanni Perrone</b> | 39  | Human factor policy testing in the sequencing of manual mixed model assembly lines   |
| <b>Xian Liu and Wilsun Xu</b>  | 61  | A new filled function applied to global optimization   |
| <b>Peixia Gao, Sabine<br/>Wittevrongel and Herwig<br/>Bruneel</b>                  | 81  | Discrete-time multiserver queues with geometric service times  |
| <b>M. Queiroz, C. Humes Jr. and<br/>J. Júdice</b>                                  | 101 | On finding global optima for the hinge fitting problem   |
| <b>Duncan K.H. Fong,<br/>Haizhen Fu and Zhaolin Li</b>                             | 123 | Efficiency in shortage reduction when using a more expensive common component  |
| <b>A. Teeninga and A. Volgenant</b>  | 139 | Improved heuristics for the traveling purchaser problem  |
| <i>Note</i>  |     |  |
| <b>Abraham P. Punnen</b>   | 151 | On bottleneck assignment problems under categorization   |
| <i>Erratum</i>   |     |  |
| <b>Joana Dias, M. Eugénia and<br/>Joao Climaco</b>                                 | 155 | Erratum to "An interactive procedure dedicated to a bicriteria plant location model" [Computers & Operations Research 30 (2003) 1977-2002] |

## NUMBER 2

- |   |     |  |
|---|-----|--|
| <b>Ali Allahverdi</b>   | 157 | A new heuristic for $m$ -machine flowshop scheduling problem with bicriteria of makespan and maximum tardiness |
| <b>E. Mijangos</b>  | 181 | An implementation of Newton-like methods on non-linearly constrained networks                                  |
| <b>Oded Berman and<br/>Richard C. Larson</b>                    | 201 | A queueing control model for retail services having back room operations and cross-trained workers             |
| <b>Zaid T. Balkhi and Lakdere<br/>Benkherouf</b>                | 223 | On an inventory model for deteriorating items with stock dependent and time-varying demand rates               |
| <b>Boris Goldengorin, Diptesh<br/>Ghosh and Gerard Sierksma</b> | 241 | Branch and peg algorithms for the simple plant location problem  |
| <b>Yuri Levin and Adi Ben-Israel</b>                            | 257 | A heuristic method for large-scale multi-facility location problems  |
| <b>V.C. Li, G.L. Curry and<br/>E.A. Boyd</b>                    | 273 | Towards the real time solution of strike force asset allocation problems                                       |

**L. Mikhailov**

*Note*

**Saul I. Gass and  
Sasirekha Vinjamuri**

*Erratum*

**Adil Baykasoğlu and  
Nabil N. Z. Gindy**

293 Group prioritization in the AHP by fuzzy preference programming method

303 Cycling in linear programming problems

313 Erratum to "A simulated annealing algorithm for dynamic layout problem" [Computers & Operations Research 28 (2001) 1367-1460]

### NUMBER 3

**Volker Lauff and  
Frank Werner**

**Michel Gendreau, Gilbert  
Laporte and Frédéric Semet**

**Thomas (Yew Sing) Lee**

**Herminia I. Calvete**

**Ümit Bilge, Furkan Kırac,  
Müjde Kurtulan and Pelin  
Pekgün**

**C.J. Liao and W.J. Chen**

**Konstantin Kogan**

**James V. Hansen**

**Belén Melián, Manuel Laguna  
and José A. Moreno-Pérez**

**Motty Birman and Gur  
Mosheiov**

317 On the complexity and some properties of multi-stage scheduling problems with earliness and tardiness penalties

347 Heuristics and lower bounds for the bin packing problem with conflicts

359 The effect of workers with different capabilities on customer delay

383 The quickest path problem with interval lead times

397 A tabu search algorithm for parallel machine total tardiness problem

415 Scheduling under machine breakdown in a continuous process industry

429 Scheduling parallel machines by the dynamic newsboy problem

445 Genetic search methods in air traffic control

461 Capacity expansion of fiber optic networks with WDM systems: problem formulation and comparative analysis

473 A note on a due-date assignment on a two-machine flow-shop

### NUMBER 4

**Parag C. Pendharkar and  
James A. Rodger**

**Yen-Liang Chen and  
Hsu-Hao Yang**

**Enrique Ballesterio and  
José A. Maldonado**

**Mayur Vamanan, Qian Wang,  
Rajan Batta and Robert J.  
Szczerba**

481 An empirical study of impact of crossover operators on the performance of non-binary genetic algorithm based neural approaches for classification

499 Finding the first  $K$  shortest paths in a time-window network

515 Objective measurement of efficiency: applying single price model to rank hospital activities

533 Integration of COTS software products ARENA & CPLEX for an inventory/logistics problem

**Bor-Ren Chuang, Liang-Yuh Ouyang and Kai-Wayne Chuang**

**Marc Reimann, Karl Doerner and Richard F. Hartl**

**Srikanth K. Iyer and Barkha Saxena**

**Alan Jessop**

**Elizabeth Jewkes, Chulung Lee and Ray Vickson**

*Note*

**Saul I. Gass and Christoph Witzgall**

549 A note on periodic review inventory model with controllable setup cost and lead time

563 D-Ants: Savings Based Ants divide and conquer the vehicle routing problem

593 Improved genetic algorithm for the permutation flowshop scheduling problem

607 Sensitivity and robustness in selection problems

623 Product location, allocation and server home base location for an order picking line with multiple servers

637 On an approximate minimax circle closest to a set of points

## NUMBER 5

**Gur Mosheiov and Daniel Oron**

**Mhand Hifi**

**Mhand Hifi and Rym M'Hallah**

**George Kozanidis and Emanuel Melachrinoudis**

**Mirosław Kwiesielewicz and Ewa van Uden**

**Michel Denault and J.-L. Goffin**

**So Young Sohn and Ki Yeol Oh**

**Uwe Aickelin and Kathryn A. Dowsland**

**Cyril Duron and Jean-Marie Proth**

**Kuo-Ching Ying and Ching-Jong Liao**

**Gholam R. Amin and Mehdi Toloo**

645 A note on the SPT heuristic for solving scheduling problems with generalized due dates

657 Exact algorithms for unconstrained three-dimensional cutting problems: a comparative study

675 Approximate algorithms for constrained circular cutting problems

695 A branch & bound algorithm for the 0-1 mixed integer knapsack problem with linear multiple choice constraints

713 Inconsistent and contradictory judgements in pairwise comparison method in the AHP

721 Solving variational inequalities with a quadratic cut method: a primal-dual, Jacobian-free approach

745 Simulation study for the optimal repair capacity of an IT maintenance center based on LRD failure distribution

761 An indirect Genetic Algorithm for a nurse-scheduling problem

779 Insertion of a random bitask in a schedule: a real-time approach

791 An ant colony system for permutation flow-shop sequencing

803 A polynomial-time algorithm for finding  $\varepsilon$  in DEA models

I Call for papers

## NUMBER 6

**Juan A. Carrasco**

807 Solving large interval availability models using a model transformation approach

- |  |     |   |
|--|-----|---|
| <b>Luiz A.N. Lorena and<br/>Edson L.F. Senne</b>                   | 863 | A column generation approach to capacitated p-median problems                                       |
| <b>Chang-Chun Lin and<br/>An-Pin Chen</b>                          | 877 | Fuzzy discriminant analysis with outlier detection by genetic algorithm                             |
| <b>Matthew J. Liberatore and<br/>Robert L. Nydick</b>              | 889 | Wash criteria and the analytic hierarchy process  |
| <b>E.U. Choo and W.C. Wedley</b>                                   | 893 | A common framework for deriving preference values from pairwise comparison matrices                 |
| <b>Kun-Jen Chung and Jui-Jung<br/>Liao</b>                         | 909 | Lot-sizing decisions under trade credit depending on the ordering quantity                          |
| <b>Kuo-Ping Chang</b>  | 929 | Evaluating mutual fund performance: an application of minimum convex input requirement set approach |
| <b>Edgar K. Rugenstein and<br/>Michael Kupferschmid</b>            | 941 | Active set strategies in an ellipsoid algorithm for nonlinear programming                           |
| <b>Yongjian Li, Xiaoqiang Cai,<br/>Fengsheng Tu and Xiuli Shao</b> | 963 | Optimization of tandem queue systems with finite buffers  |

## NUMBER 7

- |  |      |  |
|--|------|--|
| <b>Dingfei Liu and<br/>Theodor J Stewart</b>                   | 985  | Object-oriented decision support system modelling for multicriteria decision making in natural resource management                         |
| <b>W.L. Pearn and Y.C. Chang</b>                               | 1001 | Optimal management of the $N$ -policy $M/E_k/1$ queueing system with a removable service station: a sensitivity investigation              |
| <b>Kuang-Han Hsieh and<br/>Fang-Chih Tien</b>                  | 1017 | Self-organizing feature maps for solving location-allocation problems with rectilinear distances   |
| <b>Jean-Yves Potvin, Patrick<br/>Soriano and Maxime Vallée</b> | 1033 | Generating trading rules on the stock markets with genetic programming   |
| <b>An-Sing Chen and<br/>Mark T. Leung</b>                      | 1049 | Regression neural network for error correction in foreign exchange forecasting and trading   |
| <b>Hsien-Chung Wu</b>  | 1069 | Pricing European options based on the fuzzy pattern of Black-Scholes formula   |
| <b>L.R. Foulds, J.M. Wilson and<br/>T. Yamaguchi</b>           | 1083 | Modelling and solving central cycle problems with integer programming  |
| <b>Toru Higuchi and<br/>Marvin D. Troutt</b>                   | 1097 | Dynamic simulation of the supply chain for a short life cycle product—Lessons from the Tamagotchi case                                     |
| <b>Chae Y. Lee and Hee K. Cho</b>                              | 1115 | Multiple multicast tree allocation in IP network   |
| <b>Yeu-Shiang Huang</b>  | 1135 | A structural design of decision support systems for deteriorating repairable systems   |
| <b>Madjid Tavana</b>   | 1147 | A subjective assessment of alternative mission architectures for the human exploration of Mars at NASA using multicriteria decision making |

## NUMBER 8

- |   |      |  |
|---|------|--|
| <b>Kweku-Muata Osei-Bryson</b>  | 1165 | Generating consistent subjective estimates of the magnitudes of causal relationships in fuzzy cognitive maps |
| <b>Jawad Abrache, Benoît Bourbeau, Teodor Gabriel Crainic and Michel Gendreau</b> | 1177 | A new bidding framework for combinatorial e-auctions   |
| <b>Dragan Urošević, Jack Brimberg and Nenad Mladenović</b>                        | 1205 | Variable neighborhood decomposition search for the edge weighted $k$ -cardinality tree problem               |
| <b>Luca Bertazzi, Giuseppe Paletta and M. Grazia Speranza</b>                     | 1215 | An improved heuristic for the period traveling salesman problem  |
| <b>M. Helena Correia, José F. Oliveira and J. Soeiro Ferreira</b>                 | 1223 | Reel and sheet cutting at a paper mill   |
| <b>Wonjoon Choi and Robert H. Storer</b>  | 1245 | Heuristic algorithms for a turbine-blade-balancing problem   |
| <b>Yi-Chih Hsieh and Ta-Cheng Chen</b>  | 1259 | Reliability lower bounds for two-dimensional consecutive- $k$ -out-of- $n$ : F systems                       |
| <b>Bibo Yang, Joseph Geunes and William J. O'Brien</b>                            | 1273 | A heuristic approach for minimizing weighted tardiness and overtime costs in single resource scheduling      |
| <b>Dvir Shabtay</b>   | 1303 | Single and two-resource allocation algorithms for minimizing the maximal lateness in a single machine        |
| <b>Nashat Mansour, Hiba Tabbara and Tarek Dana</b>                                | 1317 | A genetic algorithm approach for regrouping service sites  |
| <b>James Flynn and Chia-Shin Chung</b>  | 1335 | A heuristic algorithm for determining replacement policies in consecutive $k$ -out-of- $n$ systems           |
| <b>Ching-Fang Liaw</b>  | 1349 | Scheduling two-machine preemptive open shops to minimize total completion time                               |

## NUMBER 9

- |   |      |   |
|---|------|---|
| <b>Herbert F. Lewis and Thomas R. Sexton</b>          | 1365 | Network DEA: efficiency analysis of organizations with complex internal structure   |
| <b>Yi Liao, Shu-Cherng Fang and Henry L.W. Nuttle</b> | 1411 | A neural network model with bounded-weights for pattern classification  |
| <b>Morten Riis and Kim Allan Andersen</b>             | 1427 | Multiperiod capacity expansion of a telecommunications connection with uncertain demand                                   |
| <b>Francisco Aparisi and J. García-Díaz</b>           | 1437 | Optimization of univariate and multivariate exponentially weighted moving-average control charts using genetic algorithms |
| <b>Attahiru Sule Alfa and K.P. Sapna Isotupa</b>      | 1455 | An $M/PH/k$ retrial queue with finite number of sources   |
| <b>Elliot Bendoly</b>                                 | 1465 | Integrated inventory pooling for firms servicing both on-line and store demand  |

- |  |      |   |
|--|------|---|
| <b>Moshe Kaspi and<br/>Dvir Shabtay</b>          | 1481 | Convex resource allocation for minimizing the makespan in a single machine with job release dates |
| <b>Rafael Martí and Abdellah<br/>El-Fallahi</b>  | 1491 | Multilayer neural networks: an experimental evaluation of on-line training methods                |
| <b>Orhan Karasakal and<br/>Esra K. Karasakal</b> | 1515 | A maximal covering location model in the presence of partial coverage                             |
| <b>So Young Sohn and Seung<br/>Hwan Lee</b>      | 1527 | Sensitivity analysis for output performance measures in long-range dependent queueing system      |
| <b>I. Atencia and P. Moreno</b>                  | 1537 | The discrete-time <i>Geo/Geo/1</i> queue with negative customers and disasters                    |
| <b>Asad Tavakoli and<br/>Constance Lightner</b>  | 1549 | Implementing a mathematical model for locating EMS vehicles in fayetteville, NC                   |

#### NUMBER 10

- |  |      |  |
|--|------|--|
| <b>Klaus Jansen and Monaldo<br/>Mastrolilli</b>                                      | 1565 | Approximation schemes for parallel machine scheduling problems with controllable processing times                                    |
| <b>Malachy Carey and Mark<br/>McCartney</b>  | 1583 | An exit-flow model used in dynamic traffic assignment  |
| <b>Chih-Ping Chiang and<br/>Shine-Der Lee</b>  | 1603 | Joint determination of machine cells and linear intercell layout   |
| <b>Jinchang Wang and Thomas<br/>Kaempke</b>  | 1621 | Shortest route computation in distributed systems  |
| <b>Önder Tomboş and<br/>Taner Bilgiç</b>   | 1635 | A column generation approach to the coalition formation problem in multi-agent systems   |
| <b>Chien-Hung Lin and<br/>Ching-Jong Liao</b>  | 1655 | Makespan minimization subject to flowtime optimality on identical parallel machines  |
| <b>R. Montemanni and<br/>L.M. Gambardella</b>  | 1667 | An exact algorithm for the robust shortest path problem with interval data   |
| <b>Lev V. Utkin</b>  | 1681 | Reliability models of <i>m</i> -out-of- <i>n</i> systems under incomplete information  |
| <b>M.M. Ali and A. Törn</b>  | 1703 | Population set-based global optimization algorithms: some modifications and numerical studies  |
| <b>Ghaith Rabadi, Mansooreh<br/>Mollaghasemi and Georgios<br/>C. Anagnostopoulos</b> | 1727 | A branch-and-bound algorithm for the early/tardy machine scheduling problem with a common due-date and sequence-dependent setup time |
| <b>Thomas J. Candalino jr.,<br/>John E. Kobza and<br/>Sheldon H. Jacobson</b>        | 1753 | Designing optimal aviation baggage screening strategies using simulated annealing  |

#### NUMBER 11

- |                                      |      |  |
|--------------------------------------|------|--|
| <b>Steven Chamberland</b>            | 1769 | An efficient heuristic for the expansion problem of cellular wireless networks     |
| <b>K. Das, T.K. Roy and M. Maiti</b> | 1793 | Multi-item stochastic and fuzzy-stochastic inventory models under two restrictions |

- |   |      |  |
|---|------|--|
| <b>Yeh Lam and Yuan Lin Zhang</b>                         | 1807 | A shock model for the maintenance problem of a repairable system                                 |
| <b>R. Caballero and M. Hernández</b>                      | 1821 | The controlled estimation method in the multiobjective linear fractional problem                 |
| <b>Ossama Kettani, Belaïd Aouni and Jean-Marc Martel</b>  | 1833 | The double role of the weight factor in the goal programming model                               |
| <b>Oded Berman and Michal Cutler</b>                      | 1847 | Resource allocation during tests for optimally reliable software                                 |
| <b>Amir H. Abdekhodae, Andrew Wirth and Heng Soon Gan</b> | 1867 | Equal processing and equal setup time cases of scheduling parallel machines with a single server |
| <b>Józef Grabowski and Mieczysław Wodecki</b>             | 1891 | A very fast tabu search algorithm for the permutation flow shop problem with makespan criterion  |
| <b>Anthony C. Keys and Loren Paul Rees</b>                | 1911 | A sequential-design metamodeling strategy for simulation optimization                            |
